PROFILE

I discovered a passion for web development while taking a graduate class involving literature and technology. Once I completed my graduate program, I began seeking out opportunities within my job to interact with our electronic health records system and coding our web page. The ability to find answers that yield immediate results has been profound and rewarding. Attending Nashville Software School has both magnified and increased those rewards.

TECHNOLOGIES

- VSCode
- Git/GitHub
- Postman
- HTML, CSS, Bootstrap, and SCSS
- JavaScript, ES6 modules, jQuery
- ReactJS, React Routing, MomentJS
- Firebase, JSON, Promises, and axios

- Remote project collaboration and learning via Zoom

FRONT-END CAPSTONE: WRITERSRESORT

Written utilizing ReactJS and data storage in firebase, writersResort allows users to post poems and invite feedback. Each user has access to edit and delete their posts and comments to posts via Axios calls. Each deleted post also deletes any comments associated with the post. Authentication occurs through Google and also pulls user's displayURL and Google Username.

Axios, Bootstrap, CSS3, ESLint, Firebase, Fontawesome-svg-core, HTML5, JavaScript, Moment.js, Prop-Types, ReactDOM, ReactJS, React Flip Move, React-fontawesome, React Router DOM, Reactstrap, SCSS
