- Test and demos current Hobby Tier product to provide feedback in regard to UI/UX

### Nashville Software School

*Intensive part-time 12-month full stack software development bootcamp* (Aug 2019- Aug 2020)

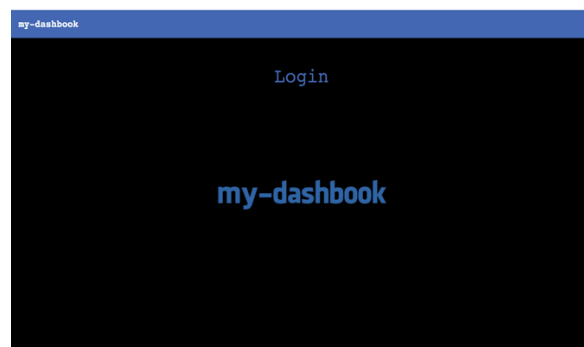

- Built browser-based single page applications using React
- Created and maintained relational databases using Microsoft SQL Server
- Source code version control with Git and GitHub

## Tech Stack

C#, React, Microsoft SQL Server, .Net Core, Dapper, Postman, JSX, JavaScript, jQuery, Firebase, Git, GitHub, Bootstrap 4, HTML, CSS, Sass, Webpack, Npm, Visual Studio, Visual Studio Code

## Front-End Capstone

[My-dashbook](#) is a single page CRUD application created to allow users the functionality to make an online legacy journal. Built in React/ JavaScript with Google Gmail Authentication using Firebase to allow users a smooth login process. React Router used to render the various pages creating a clear UI/UX experience. The layout and components of all pages were constructed using Bootstrap 4. The app using Facebook Developer SDK allowing users the ability to comment in the app and share these comments on Facebook in real time.

## Professional Experience

### State of Tennessee

Real Property Agent (January 2017- Present)
