PROFILE

In my career, I have always been a problem solver who was looking for more challenges. I enjoy the challenge of taking a problem and breaking it down. This is why I was always intrigued with software development and why I was hooked the moment I started learning and working as a developer. My background and experience working in global organizations, and now, small-start up environments, has given me the opportunity to look at different problems with different viewpoints, and map out the best solution.

PROJECTS

Front-End Capstone - Digi-Caddie

Utilized ReactJS to build a web application that allows users to search golf courses in their area and leave caddie tips on holes along the course. Application also allows users to track their scores by charting their last 5 scores in a graph keeping a running average of their scores.

github.com/phillipsja97/digiCaddie

Technologies Utilized: ReactJS, Firebase, React Bootstrap, amCharts, JSON, Javascript.

Back-End Capstone - Restaurant-Roulette

Utilized ReactJS to build a full-stack web that allows users to create a session with friends on choosing a restaurant to go out to. The UI has a swipe interface that allows the user to swipe yes or no on a restaurant. Once all users on that session have swiped, the matches are compiled and a random restaurant is selected out of the matches.

github.com/phillipsja97/
RestaurantRoulette-Capstone

Technologies Utilized: ReactJS, C#, ASP.NET, SQL Server, Dapper, Material-UI, Ant-Design, React-Swipeable-Cards, Firebase.

EDUCATION

NASHVILLE SOFTWARE SCHOOL

Full-Stack Web Development Boot-camp

Middle Tennessee State University

BACHELOR OF SCIENCE

Mass Communications, Electronic Media Communications

TECHNICAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

Attending an intensive, part-time, 12-month full stack software development boot-camp, focusing on the development of both individual and team-based projects in a simulated company environment

- Gained experience working in an Agile/Scrum environment.
- Used Git and GitHub for version control and Source Control Management.
- Created a golf application that gave users the ability to leave tips on holes at certain golf courses and also track their scores
- Created a full-stack restaurant randomizer application that allows users to swipe yes or no on a list of restaurants and then their matches will be compared, and random winner chosen.
- Used JavaScript, jQuery, Bootstrap, React.js, React Bootstrap, C#, .NET, and ASP.NET.

TECHNICAL SKILLS

- | | | |
|------------------|---------------------------------|----------------------|
| • HTML/CSS | • SQL Server | • Axios |
| • JavaScript | • Transact-SQL | • ASP.NET Core |
| • React Library | • Node.js | • Postman API Client |
| • C# | • Auth0 | • React Native |
| • .NET Framework | • Firebase Database and Hosting | |

EXPERIENCE

SOFTWARE DEVELOPER | Contractor

April 2020 – Present

Compute Cycles, LLC, Nashville, TN

- Working on a small team of developers, in a small start-up type environment, with work-flow autonomy and delivering on-time results.
- Created an extension built upon Scratch.mit.edu web application.
- The extension is a satellite sprite that represents a 16-light circular satellite and allows the user to create light sequences with colors and patterns.
- Created custom blocks to control the sprite SVG and a string parsing system that converts a hexadecimal code into a 16-bit binary string to represent the 16 lights in the satellite.
- Primarily worked with JavaScript within a Node.js server and a React Library.
- Created publishing and subscriptions patterns to a MQTT Broker to send data between programs.

EXPO

August 2019 – March 2020

Husk Nashville, Nashville, TN

- Manage nightly kitchen operations for up to 250 guests to ensure each order is completed on time while simultaneously finalizing plate presentations.
- Contributed to food prep with head chef for any specials on the menu

ACCOUNT EXECUTIVE

January 2018 – August 2019

AIG Direct, Brentwood, TN

- Started at AIG as a Sales Representative, where I exceeded my monthly quota of 25k-30k annualized premiums, and was promoted to an Account Executive.
- Assisted clients in the enrollment process through documentation reviews, which increased enthusiasm and commitment to AIG Direct services.
- Facilitated a Client Management role by continuously meeting the needs of clients through the analysis of their current health platform, and by providing recommendations on solutions that would be more in-line with budget requirements.
- Top producer averaging \$100,000 - \$150,000 annualized premium per month in sales revenue.
- Marketed various accounts based on client needs to multiple carriers such as American General, Prudential, Banner, Mutual of Omaha and others.

JAMIE PHILLIPS

EXPERIENCE CONTINUED

SALES DIRECTOR

December 2014 - December 2017

Taziki's Mediterranean Cafe, Metropolitan Nashville, TN

- Developed and maintained new and existing clients by cold calling, account management, building relationships, marketing brick and mortar locations, and brand promotion
- Successfully acquired and tracked an average of \$45,000 worth of new business each month in catering sales through CRM software.

Aviation Support Equipment Technician

November 2008 - November 2011

United States Navy, San Diego, CA

- Maintained various aviation support equipment by performing routine maintenance and using extensive troubleshooting to diagnose the problem and provide a solution.
- Proved exemplary leadership skills in leading a team of sailors to ensure completed tasks and maintenance.
- Meritoriously promoted to Third Class Petty Officer out of five thousand applicants on the US Ronald Reagan by the Commanding Officer for exemplary services and dedication.

Firefighter

August 2006 - August 2008

Apex Fire Department, Apex, NC

- Administered medical care to injured people, providing CPR, first aid, emergency response and inspected firefighting equipment and hydrants, performing minor maintenance repairs that minimized malfunctions by 10%.
- Exercised quick and critical thinking to analyze a situation and detail the correct course of action.
- Displayed effective communication skills in order to foster the team environmental dynamics to achieve a common goal.
