EDUCATION

Nashville Software School
Full Stack Web Development
The University of Tennessee
M.S. Education & Theory
B.A. English

ABOUT ME

II am seeking a position where I can grow my web development experience and make use of my existing skills in information gathering, planning, design, development, testing and delivery of web applications. I am passionate about utilizing software architecture and design to create a great user experience that also meets the needs of the business.

INDIVIDUAL PROJECT

CREATE BEAUTY: FRONT-END CAPSTONE

Welcome to Create Beauty, the web application that allows you to store your makeup creations! I love how makeup gives confidence, transforms, and enhances ones beauty. This application allows a user to upload a makeup look, the routine, and products used so that they can refer back to it later. As an added bonus, users can rate their looks by choosing a "makeup" rating.

Tech Stack: React.js, Bootstrap, Firebase API, and JavaScript, CSS, HTML5, Moqups, Github, & Git
Github: github.com/CharityBunyon/Create-Beauty
Demo: https://create-beauty.firebaseapp.com/auth

GROUP PROJECT

ACTIVATE ME: BACKEND CAPSTONE

Welcome to ActivateMe, the web application where you can earn points and badges when you eat plant-based foods and exercise. This application allows a user to log food and exercise to earn badges that will appear on their dashboard. The app also provides users with recipes and workouts that they can try in order to encourage them to be more healthy and active!

Tech Stack: C#, .NET, MS SQL Server, React, Semantic UI, Moment.js

EXPERIENCE

Full Stack Software Developer
Nashville Software School | July 2019- Present
Twelve month full-stack web development bootcamp that focuses on introducing

- Utilized Git source code version control with GitHub
- Built single page apps using **HTML, CSS, JavaScript, Bootstrap, jQuery, Sass, SQL, C#, .NET, Semantic UI** and **Photoshop**
- Build CRUD applications using **React, Firebase API** and **React Routing**
- Created REST API with **C#** and **.NET** frameworks and built React front-end app to interact
- Built relational databases with Microsoft SQL Server and T-SQL
- Enacted user authentication, user-specific fetch calls, and CRUD functionality
- Emphasized DRY, modular, and reusable code components
- Created wireframes and entity relationship diagrams in planning stages
- Test and debug code using React or Chrome developer tools and Visual Studio

Instructional Designer
naviHealth | October 2019 - May 2020

- Build and deploy courses, programs, and tests using the LMS and other online course authoring
- Proficient in Articulate Storyline and Rise, which are e-learning authoring tools that provides an improved user interface and interactive learning elements
- Develop the training program including lesson plans, e-learning modules, and reference documentation for several lines of business and clients
- Meet with key-stakeholders and subject matter experts (SMEs) to discover need for training materials
- Research training opportunities with the team, including stakeholders and SMEs
- Uses project management skills to provide a detailed account of work required to complete the project and the deliverables to be produced.
- Collaborate with stakeholders, SMEs, and other team members to review and apply feedback to training materials

Corporate Trainer
Advance Financial | June 2018 - October 2019

- Planned, organized, and developed training materials that met specific needs for new hire orientation, continued learning, and new manager training
- Worked closely with instructional designer and learning management systems to design e-learning assessments and modules for new hires to that adhered to compliance and company standards
- Conducted classroom and field training to internal partners.
- Collaborated with management to identify learning objectives, content development, and delivery of proposed training for internal employees
- Assisted in developing an employee mentoring program for newly promoted leaders

English Instructor
Martin Luther King Jr. Magnet | July 2014- May 2018

- Trained teachers how to make lesson plans and assessments that exceeded state standards and expectations while also tracking students progress throughout the year
- Taught 7-12 grade students, but mostly high school students in English, Creative & Technical Writing
- Used data to change my curriculum based on item analysis on assessments to reveal where students struggled the most on a particular skill
- Conducted monthly student evaluations to provide feedback on strengths and weaknesses in order to improve my teaching but also to improve students knowledge about a particular skill
