PROJECT

COVID-19 & POLICY TRACKER

In light of the Coronavirus (COVID-19) outbreak, many of us were impacted in unexpected ways. The tracker color codes each state based on the last percent change of positive cases over the past 14 days. The tracker also shows positive cases per state overlaid with Coronavirus policy changes for that state.

Tools Used:

- C#, ASP.NET Core 3.1, TSQL, React, JavaScript, Reactstrap, Axios, and SVGs

https://github.com/kelseycreel/covid19

TECHNICAL SKILLS

Project Management

C#

NET

React

SQL

JavaScript

CSS

HTML

jQuery

Qlikview

SCSS

Visio

Agile Methodology

ABOUT

Project manager turned software developer. Experience has led to an exposure of a wide range of areas, including agile development, product design, client management, implementations and process improvement. Passionate about problem solving and innovative solutions.

EXPERIENCE

Nashville Software School

Twelve month Full-Stack Web Developer Bootcamp (HTML, CSS, Javascript, React, C#, .Net) focusing on problem solving and team cooperation.

- Used Git and Github to for source control planning
- Team lead on 4 group projects
- Backend development with C# and ASP.net Core 3.1
- Remote project collaboration and learning via Zoom

BEAUTY MARK

Many cosmetic companies use "natural" and "organic" to entice consumers into believing their products are safer than competitors, while still including harmful ingredients. Beauty Mark is a web application that allows users to login, search for their cosmetic products and learn more about the harmful ingredients. Users can add and remove products to their makeup bag & start their search by selecting a category. Each product will display any harmful ingredients it may contain.

TOOLS USED:

- Axios, JavaScript, React, Reactstrap, Generated a database of makeup products in Firebase from an open-source API
