PROJECTS

DAILY BLUEPRINT - FINAL CAPSTONE

A organizational app where users can create to-do lists, set to-do items as priorities, and tag co-workers involved with the to-do items. Features a team view of priorities designed to facilitate stand-up meetings. Also includes a Pomodoro timer to assist users in managing their focus time.

- C#/ASP.NET Core Web Application
- Database created and modified using SQL Server Management Studio
- ReactJS used for client-side application
- Pomodoro timer powered by JavaScript
- Responsive styling with SASS and Bootstrap

🌐 github.com/aclai4067/daily-blueprint-capstone

ONE REASON - FRONT END CAPSTONE

A mindfulness app that encourages the user to enter one reason per day for working toward their goals. Reasons can be public or private. Users can review and support other member's public reasons.

- ReactJS application using full CRUD
- Routing with react-router-dom
- Utilize Firebase for authentication, data storage, and hosting
- Interchangeable themes created using Sass mixins
- Navbar and modals created with ReactStrap

EDUCATION

NASHVILLE SOFTWARE SCHOOL
Full Stack Wed Development Bootcamp
2019 - 2020

GEORGIA STATE UNIVERSITY
BFA in Art Education
2004 - 2008

ABOUT

I am a software developer with a background in art, customer service, and international credential evaluations. The realization that web development was the right career path for me was a huge light bulb moment in my professional life. I discovered my predilection for software development while in pursuit of a career that allows for continuous growth, and where my interests in collaboration, research and creative problem solving would be well suited.

I started learning to code using teamtreehouse.com courses and quickly found myself chomping at the bit to enroll in Nashville Software School. I currently work full time in Account Management, while completing Nashville Software School's part-time web development bootcamp on evenings and weekends. I will graduate in August 2020 and am excited to transition into a software development career.

TECHNICAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL
Software Developer | August 2019 - Present
Full year part-time software development bootcamp focusing on full stack development fundamentals and problem solving.

- Source code version control and Project planning/tracking with Git/GitHub
- JavaScript fundamentals including modular, readable code and reusable components
- Built single-page applications with HTML, CSS, and JavaScript libraries like jQuery, and linting with ESLint
- Built full CRUD applications using ReactJs framework
- Database/API utilizing Firebase, JSON, promises, and axios calls
- Styled applications with CSS, Bootstrap and wrote custom styles with SASS
- Created and modified databases using SQL Server Management Studio,
- Created RESTful APIs with C#/.NET using WebAPI
- Developed console applications and unit tests using C#/.NET
- Collaborated remotely on group projects using Slack and Zoom
